AERVOE #120 MATTE CLEAR ACRYLIC

DESCRIPTION: Aervoe Matte Clear Acrylic spray is a non-gloss, non-yellowing clear coating that provides superior preservation and protection. This finish forms a tough, flexible, clear film layer that can be used indoors and outdoors. Use as a protection against rust, corrosion, tarnish, oxidation, and oils.

APPLICATIONS: Can be used to coat electrical components, metal hoods, lamps, copper or brass fixtures. Do not apply over other sealers without testing a small area for compatibility first.

DIRECTIONS: Surface must be free of all dust, dirt, grease, and wax. Use at temperatures between 60° and 80°F (16° to 27°C) for best results. Holding the can at least 6" to 8" away from the object to be coated, spray with smooth side-to-side motions. Apply as many coats as necessary for desired effect. Several light coats are better than one heavy coat. Allow 30 minutes drying time between applications. To prevent clogging, turn can upside down and depress spray nozzle for 2 seconds.

SHAKE WELL BEFORE USE

DANGER! Keep away from heat, spark or open flame. Avoid prolonged overexposure to sunlight, which may cause bursting. Do not puncture, incinerate or store above 120°F (49°C). May cause flash fire. Avoid continuous breathing of vapors and mist. Use with adequate ventilation. If you experience eye watering, headaches, nausea or dizziness, increase fresh airflow and/or wear respiratory protection (NIOSH/MSHA TC 23C or equivalent). **FIRST AID:** If swallowed, do not induce vomiting. If eye contact occurs, flush eyes with plenty of water for 15 minutes. For skin contact, wash thoroughly with soap and water. In either case, if irritation persists, see physician immediately. Call physician immediately. **NOTICE:** Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful or fatal.

WARNING: This product can expose you to chemicals including quartz, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov.

HAZARDOUS CONTENTS: n-Butyl Acetate 123-86-4, Acetone 67-64-1, Aliphatic Petroleum Distillates 64742-89-8, Hydrocarbon Propellant 68476-85-7.

DANGER! Extremely flammable gas. Extremely flammable aerosol. Pressurized container; may burst if heated. Highly flammable liquid and vapor. Flammable liquid and vapor. May be fatal if swallowed and enters airways. May cause genetic defects. May cause cancer. Causes serious eye irritation. May cause drowsiness or dizziness.

KEEP AWAY FROM CHILDREN
