

WORK LIGHTS

9710 with included adapters

9720

9711 shown with 2 #9710 Work Lights (sold separately)

9710 Portable/Rechargeable LED Work Light

A portable, rechargeable LED work light for the jobsite or home, indoors or out. Features 88 powerful LEDs, 600 lumens, and an angle adjustment for easy subject lighting. Recharge using any Sierra Wave solar collector, Power Center, or the included 120V wall charger or 12V vehicle charger for cordless operation.

9711 Work Light Metal Stand

Heavy duty stand made specifically for the #9710 Work Light. It telescopes from 2½ to 5 feet, and holds 1 or 2 Work Lights (sold separately). Utilizes a twist action height adjustment and finger tightening bolts so no tools are required. Collapses for storage.

9720 Portable Area Light

Portable lighting has never been easier with this 12V-powered 3-Watt, 66 LED light. It comes as a single unit, with shade, a 10-foot extension cord, a 30-inch 12V DC power cord, and a carabineer for easy installation anywhere. Each lamp has its own power switch, and can be powered from any 12V power source, including a vehicle or Sierra Wave power supply.

A 3-pack kit (with only one power cord) is also available, #9721.

WORK LIGHTS

FEATURES

#9710 Work Light

Replacement Bulbs

USES

The 9710 Work Light may be used with or without the metal stand. The base that comes with the light allows it to stand alone on a floor or table top. The base can be removed for installation on the metal stand. Use the work light in construction, auto repair, home repair, or emergency preparedness. Because it is cordless, take it anywhere light is needed! The 9720 Portable Area Lights may be plugged into any 12V DC power source, including vehicles, boats, and Sierra Wave power supplies. Up to ten lights may be strung together from a single power supply. Carabineers allow convenient ways to hange the lights anywhere, and individual power switches for each light makes custom lighting easy.
