## STRIPING STICK

PRODUCT NUMBERS: 1745 STRIPING STICK

Patent  
Pending

### I. GENERAL DESCRIPTION

**Description:** This striping applicator is for use with Aervoe Striping Paint and designed to make an approximately 3" wide stripe. This design features our unique trigger and grip for superior ergonomics for all day striping or stenciling jobs. Design patent pending.

**Benefits:** Sturdy, yet lightweight and can be operated with either hand. The elongated trigger allows for 1, 2, or all 4 fingers to activate the valve on the paint can and the rubberized handle keeps the hand from slipping. The #1745 Striping Stick includes a rubberized wheel to make stripes and stenciling easier over asphalt, concrete, and many soil conditions with minimal binding.

**Applications:** Use to make or repair stripes in parking lots or warehouse floors. Can be used on sidewalks to create tour guide routes. For DOT, use to make temporary lane changes during road construction or repair.

**Directions:** Remove cap and insert can into the applicator cartridge orienting the wings of the tip in line with the oval actuator slot. To prevent puddling at the beginning of the stripe, set the #1745 a few inches behind where the mark starts and begin moving forward. Squeeze trigger where the line starts to begin application. Walking speed will determine coating thickness; slower speed equals thicker coat and longer dry time. For additional information, please review the associated PDS on specific Striping Paint being sprayed.

**Limitations:** Please refer to Safety Data Sheet for specific Marking Paint product information on material hazards, etc.

### II. SHIPPING, STORAGE AND HEALTH

IMDG number.....	Not regulated material
D.O.T. container spec.....	Not applicable
D.O.T. shipping description.....	Not applicable
